- Web development using Ruby on Rails from Coding Dojo — October 2016
- Web development using MongoDb, Express, Angular and NodeJS from Coding Dojo — September 2016
- Web development in Python (Using Flask and MYSQL) from Coding Dojo — August 2016
- HTML and CSS from Coding Dojo — July 2016
- SQL beginner, intermediate and advance course from Dataquest.io — June 2016
- Data visualization course from Dataquest.io — June 2016
- Python for data sciences from Dataquest.io — May 2016

PROFESSIONAL EXPERIENCE

Resident   **(October 2016 – Present)**

Coding Dojo: An immersive coding boot camp in Dallas, TX.

- Developed and deployed websites using MEAN, Python and Ruby on Rails stacks
- Created fully integrated website following Restful or Semi-Restful routes including setting up the database.
- Practiced keeping the code clean and modularized and worked with multiple MVC frameworks.
- All projects are deployed at harditsingh.net using Amazon AWS services and Nginx server.

RELEVANT EXPERIENCE

Senior Finance Manager   **(September 2014 – December 2014)**

Taxi for Sure: A tech startup - Bangalore, India

- Managed a team of 9 people with 2 direct reports.
- Key person in company's fund raising initiative. Built a fully integrated model for the company befitting its unique business model and coordinated with various departments within the company to supply information for the pitch book.
- Was in charge of management reporting, both routine and ad hoc. Assisted management with financial modeling required to evaluate various projects.
- Assisted with planning and budgeting. Coordinated goal optimization with branch heads and senior management. Allocated funds according to macro and micro organizational goals.

Senior Analyst   **(August 2013 – August 2014)**

Copal Amba Research: A Moody's analytics company - Bangalore, India

- Assisted key senior level clients in planning and executing internal programs. Ran a data quality program and reduced the number of issues from 300+ down to the single digits.
- Prepared various periodic presentations and performance reports that were directly published by the client.
- In charge of troubleshooting internal data management system issues for analysts based in Asia.
